|---------|--|
| 10/2-3 | Conversions & Graphing Assessment |
| 10/6 | Mousetrap Car DUE
All late work due |
| 10/9-10 | Mousetrap Report DUE |
| 10/9-12 | SLC week
Minimum Days |
| 10/30 | Spirit Week |

Ways to Help your Student

- Check the table of contents online and make sure they have all papers on the correct page and GLUED IN!
- Check their homework daily that should be completed.
- Check Powerschool to ensure that your student is continually improving.
- Encourage your student to come to office hours to get help!

This Month in Physics...

This month students will be finishing up their Unit on Conversions. Students will continue to practice their graphing skills by graphing the race of their Mousetrap Car. This is their first project and the students will be getting a group grade and individual grade for different portions of the project. Students will be assessed on their collaboration, quality of the car, and knowledge of Conversions and Graphing.

Student Led Conferences are the second week in October. It is a school expectation that *all* families attend SLCs. If you are not able to attend your scheduled time, please reschedule for another time that week. If a student does not attend during that week, they will have a parent conference scheduled with all their teachers at a later date.

There will be a field trip later in October to help the students with their Exhibition project which will be introduced them later this month. Field trip date and location TBA

Scientists of the Month!!

Period 1/3- **Kenai Jennings**

Period 9/11- **Blake Rawls**

Period 6/8- **Aidan Scott**

Period 10/12- **Ari Rodriguez**
